

Training for Examiners

The **Training for Examiners** program is an initiative aimed at qualifying trainers and supervisors to become professional examiners capable of conducting and evaluating theoretical and practical exams effectively. The program focuses on developing the necessary skills and knowledge to ensure that exams are conducted according to the highest standards of quality and accuracy. This includes several aspects, such as:

Exam Preparation and Performance Assessment Methods

Participants learn how to design exams that align with the required competencies, reflecting the skills and knowledge that trainees should acquire. This includes developing effective and measurable assessment tools and ensuring they align with training objectives.

Coordination Between Competencies and Resources

Participants are trained to coordinate the competencies required for each training role and utilize the available resources within training institutions effectively. This enhances the efficiency of the examination process and ensures a high-quality learning experience.

Program Importance

- **Enhancing the Quality of Examination Processes:** By training examiners in accurate and systematic evaluation methods, the program contributes to improving the quality of vocational and technical education.
- **Strengthening the Credibility of Certifications:** When trainees are assessed by trained examiners, the certificates they receive are more recognized and credible.
- **Developing Educational Staff:** The program offers participants an opportunity to enhance their skills and advance their careers. Attending this training is an important step for those wishing to join the examination team in the vocational education sector.

In summary, the **Training for Examiners** program is not just a technical training but an investment in improving local competencies and raising professionalism in vocational education and training.

Training Topics

The program aims to train participants on methods for conducting theoretical and practical exams, with a focus on how to coordinate competencies with available resources within training institutions.

Certification

All participants will receive a **Certificate of Completion** from the Vocational Education and Training Department at the Chamber.

The training program is **mandatory** for those who wish to participate in examination processes with the Vocational Education and Training Department. It also serves as an opportunity to develop skills in organizing and managing technical examinations.
